

Vivek Hingu

Ahmedabad, Gujarat | +91 88666 88575 | Mail | LinkedIn | Github

Professional Summary

Aspiring **AI & Machine Learning Engineer** pursuing a B.E. in Information Technology at SAL College of Engineering. Skilled in Python, Machine Learning, Data Science, NumPy, Pandas, Scikit-learn, and Generative AI with hands-on experience building AI-powered applications and intelligent systems.

Education

SAL College of Engineering, BE in Information Technology

July 2023 – June 2027

• CGPA: 8.35/10

• **Coursework:** Machine Learning, Artificial Intelligence, Data Science, Probability & Statistics, Linear Algebra, Data Structures & Algorithms, DBMS, Python Programming

Technical Skills

Programming: Python, Java, Java script, Html, CSS, Flask

Machine Learning: Scikit-learn, Supervised Learning, Classification, Regression, KNN, Decision Trees, Naive Bayes, Model Evaluation

Data Science: NumPy, Pandas, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)

Artificial Intelligence: Prompt Engineering, AI Chatbots

Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub, VS Code

Projects

BharatBhasha AI | Demo

Tech Stack: Grok API, HTML, CSS, JavaScript, NLP

- Developed an AI-powered multilingual communication platform supporting text and voice interactions across multiple Indian languages.
- Integrated Grok API to generate context-aware multilingual responses and improve communication accessibility.
- Built a scalable backend using Node.js and Express.js for real-time AI-powered conversations.

Reverse Recipe Engine with Local Flavor

Tech Stack: Python, Flask, Gemini API, HTML, CSS, JavaScript, Unsplash API

- Developed an AI-powered application that generates regional recipes from user-provided ingredients.
- Integrated Gemini API to provide personalized recipe recommendations and cooking instructions.
- Utilized Unsplash API and designed an intuitive interface to enhance user experience.

Book Recommender System

Tech Stack: Python, Pandas, Scikit-learn, Cosine Similarity

- Built a machine learning-based recommendation system using Cosine Similarity.
- Performed data cleaning, preprocessing, and analysis on large datasets using Pandas.
- Delivered personalized book recommendations based on user preferences and reading patterns.

Achievements

- Flinders University AI Hackathon – 2nd Place, AUD 300 Prize.
- Top 10 Finalist – AIT Hackathon 2K25.
- 1st Prize – Robo Soccer Competition.
- Google Cloud Arcade Champion 2025.

Certifications

- Machine Learning – NPTEL (2026)
- Build RAG Chatbot with Python – LetsUpgrade
- Data Analysis with Python – freeCodeCamp (2025)
- Python for Data Science – IBM (2025)
